SGS
SECURE GLOBAL SOLUTIONS

stages™ in the cloud

**Providing central station solutions and expertise for over 10+ years**

Integrate Best Practices

Streamline Dispatch & Data Entry

Reinforce Policies & Procedures

Collaborative Solutions

stages™ in the cloud is produced by SGS and offered by a partner to create a complete solution to managing services for a dealer or a branch. Every stages™ implementation is capable of supporting cloud solutions with a wide range of technology integration. The stages™ platform supports data segmentation and access to all communication services. nextStage™ is an optional extension to enable local processes.

Central Processing — stages™ in the cloud — Data Storage — Signal Input

Local Sites: CS Dispatchers — Smartphone — Dealers — nextStage™

| **Support communications to customer with IVR, SMS, email and mobile** | **Manage staffing with offsite capacity and reduce IT staff costs** | **Integrate third-party applications for accounting, video, guarding and more** |

The SGS nextStage™ system permits a local monitoring group to operate autonomously and gain the advantages available from a full service wholesale central station using stages™ automation platform. This solution maximizes versatility and allows for optimum utilization of stages™ integrated features. An extension of stages, nextStage™ provides local only processing capacity with results delivered in the cloud.

Shaping your Central Station Strategy

Secure Global Solutions LLC (SGS) was formed in November 2006 to develop leading edge technology for the alarm monitoring industry. Our founders and shareholders include the original organizers of Monitoring Automation Systems (MAS) and the product architects for MASterMind and MASweb.

Founding Principles

Our view in 2006 was that dynamic changes in IT systems & architecture enabled new approaches to monitoring and central station problems. Further, we believed that technology components in communication were rapidly developing and fostering tighter integration of data and the timely delivery of information. SGS core principles are founded on the following:

Technology Leadership	In-depth industry knowledge and experience
Communications Expertise	Integration of signal processing, voice, video, multimedia integration into a single ecosystem, providing unparalleled operations excellence
Support Services	24/7 service and support provide a minimal downtime to your operations and a maximum value to your bottom line.

These core competencies drive our passion for the success of our customers.

Get started with Secure Global Solutions today
SGS is a team of professionals dedicated to helping central stations maximize the value of their investment in operations management. With over 170 years of collective experience, SGS is a technology partner you can trust.
